

AMITY UNIVERSITY MAHARASHTRA
AMITY SCHOOL OF ENGINEERING & TECHNOLOGY
B. Tech Computer Science & Engineering
ACADEMIC YEAR: 2025-26(ODD)

Course	:	B.Tech (CSE)
Course Code & Subject:		CSE 2301 & DCCN
Semester & Year	:	5 th Sem / 3 rd year
Division/Batch	:	A

ASSIGNMENT-2

1. What are the three phases of circuit switching? (BT-1: Remember)
2. Differentiate between datagram and virtual circuit packet switching. (BT-2: Understand)
3. Compare circuit switching and packet switching in terms of efficiency, delay, and reliability. (BT-4: Analyze)
4. Describe the steps of implementing network software using layered protocol architecture. (BT-3: Apply)
5. With neat diagrams, explain the process of circuit switching and packet switching. Compare both and suggest which is better for data communication. (BT-5: Evaluate)
6. Design a case study: A company wants to set up communication for VoIP (Voice over IP). Evaluate whether circuit switching or packet switching is suitable, and justify your choice. (BT-6: Create/Evaluate)

Instructions:

1. Attempt all questions.
2. Neatly write answers with proper diagrams wherever necessary.
3. Late submission will not be entertained.
6. Attach a cover page mentioning your Name, Roll Number, and Division.

Submission Deadline: on or before 21st September 2025.
